# **Working Conditions Primary Source Analysis**

1. What features of child labor seemed newly objectionable in the context of factory industry?

2. What were the main goals of factory work rules? What problems did they address? What innovations did they particularly suggest, compared with more traditional work patterns?

3. What does Max Lotz see as the primary problems of mine work? Were work conditions getting better or worse by 1900 in highly industrialized societies like Germany? Why might some workers disagree with Lotz's assessment?

4. Do problems of work in the 19th century Europe suggest that industrialization deteriorated the quality of human life? What other factors need to be taken into account? How did workers and others deal with the issues identified in these documents?

# Choose Your Own Adventure

1. Summarize what happened to you in your story
2. Besides textiles, what were a few other processes which the steam engine was applied to?
3. After Great Britain, where did industrialization spread to and what happened to it because of its spread?
4. Who made up the bourgeoisie?
5. Who were the proletariat?

# Crimean War

- 1) What three things had been used in warfare for the past 300 years?
- 2) What was Waterloo (do some research... Wikipedia) and how was it the end of an era?
- 3) What three new technologies used in the Crimean War?
- 4) Who was the aggressor in this war and why did France and Britain join?
- 5) How was the Minié bullet different?
- 6) Why is the “The Charge Light Brigade” such a famous story? And how does it apply to the quote from the video: “tactics had not caught up to technology”?
- 7) How was Florence Nightengale revolutionary?
